

Without effective antibiotics many routine operations like hip replacements, organ transplants, caesarean sections and treatments for sepsis or chemotherapy will become increasingly dangerous or impossible.

Over-use of antibiotics can lead to the development of drug-resistant bacteria which can cause serious infections.

Antibiotics can cause side effects such as rashes, thrush, stomach pains, diarrhoea, reactions to sunlight and other symptoms

Help conserve antibiotics so that they remain effective

Your actions can protect antibiotics, join us at AntibioticGuardian.com
