

Did you know that your GP will no longer normally prescribe over-the-counter medicines for minor ailments?

Your pharmacy can help!

Please speak to our pharmacist about stocking up on your medicines cabinet to treat common conditions for you and your family. By keeping a selection of essential medications at home you can treat common conditions in a timely manner and avoid unnecessary trips to see your doctor or even visits to the A&E department.

Our community pharmacists have the knowledge and skills to advise you on treating everyday ailments. You don't need to make an appointment – just pop in and see our pharmacist and they will be happy answer any questions you may have.
